† Died.

THE
THIRTY-THIRD ANNUAL REPORT
OF THE
BOARD OF DIRECTORS OF CITY TRUSTS

To the Councils of the City of Philadelphia, the Board of Appointment, composed of the Judges of the Courts of Common Pleas of the County of Philadelphia, and the Legislature of the Commonwealth of Pennsylvania :

GENTLEMEN :

IN compliance with the Act of Assembly entitled "A Further Supplement to an Act entitled 'An Act to Incorporate the City of Philadelphia,' approved the second day of February, one thousand eight hundred and fifty-four, creating a Board called Directors of City Trusts," approved June 30th, 1869, the Board of Directors of City Trusts respectfully present this the Thirty-third Annual Report of the several Trusts under their administration, for the year ended December 31st, 1902.

The only change in the membership of the Board was caused by the resignation of Mr. James L. Miles as President of Select Council on December 31st last, because of his election to the office of Sheriff for the County of Philadelphia.

Mr. Edward W. Patton, having been elected to fill the vacancy caused by the resignation of Mr. Miles, became *ex-officio*, a member of the Board.

The numerous Trusts administered by the Board have received the same careful and conscientious attention by our executive officers and employés as in previous years, and the several reports hereto appended, give in full detail the results of the past year's doings.

All of our officers have rendered efficient service in their several places, and it gives the Board pleasure to make public record of this fact.

The report of the PRESIDENT OF GIRARD COLLEGE (*Appendix D*) is replete with statistics covering the year's work.

The condition of the buildings and grounds is all that can be desired; the affairs of the Household of the Institution, through which a family of 1883 persons is housed and fed, and 1525 clothed, are in an equally satisfactory condition, and the educational work is in the hands of a corps of able instructors, whose labors for the mental training of the pupils accomplish gratifying results.

Two changes occurred in the faculty of Girard College:

Miss Laura E. Baymore, teacher in Second Form, and Miss Lenna M. Vautier, teacher in First Form, resigned.

Miss Alice Potter Ervin and Miss May Kennedy were appointed to fill the vacancies.

In the department of the Household, Dr. Henry C. Godfrey, Resident Physician, resigned, and Dr. Howard G. Fretz was appointed in his place.

Dr. H. R. Wharton was appointed surgeon, and a surgical ward is now being equipped in the Infirmary Building.

When this is completed it will be no longer necessary to remove our pupils to the neighboring hospital for surgical treatment.

Mrs. Elizabeth Krickbaum, a governess since 1884, died on November 17th, 1902. The following minute of the Board admirably recites the efficient services of Mrs. Krickbaum:

"In the death of Mrs. Krickbaum, Girard College has suffered an irreparable loss. Her life was an example of Christian living; her teaching was that of the Christian teacher; and her beneficence was Christian beneficence, since it consisted in giving herself. Quiet, modest and retiring in disposition, she was nevertheless devoted, persevering and constant in the discharge of duty.

"For seventeen years she had under her care the many hundred boys on their first admission into the College, a work of great anxiety and responsibility. These children, some but six years of age, came to her, many ill-trained, all homesick, and called for motherly tenderness and care.

"If at times she felt discouragement there was no outward manifestation of it. If she was ever impatient or fretful, such was her self-control that her nearest friends failed to notice it. She lived and acted as if always in the presence of the Master who has said: 'Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me.'

"She has passed from earth, but her works will live in generations to come in those whose lives she has directed, and whose characters she has moulded, and who will rise up to call her blessed."

Mrs. Margaret J. Thomas was appointed Governess to fill the vacancy caused by the death of Mrs. Krickbaum, and Miss Louisa Lau was appointed Governess and assigned to duty in the Matron's office.

Mr. Thomas Perrins, for 44 years an officer of the College, 30 years as Steward, died on March 17th, 1902, aged 81 years, having been previously retired by reason of age.

The more important alterations in the buildings of the College comprise the fitting up of four school rooms in Building No. 10, which building is now fully occupied, for instruction only.

The transfer of the schools heretofore taught in Building No. 3 to the newly equipped rooms, vacated several rooms which were arranged for section rooms, and three sections were changed from Building No. 5 to Building No. 3.

This last removal permitted a refitting of the first floor of No. 5 and resulted in the enlargement of the offices of the President of the College and the fitting up of new offices and of a store room for the Steward.

These officers have now pleasant and commodious quarters for the transaction of the business of the College, and all the alterations contribute much to the comfort and convenience of the pupils and their teachers and caretakers.

It is hoped that the matter of physical training will also be benefited by the assignment of larger accommodations, but the much needed and greatly desired gymnasium cannot yet be built, for want of funds available for this purpose.

Some important changes were made, principally in the curriculum of the Fourth and Third Schools, which are printed in full in the President's report.

Additional time in the Mechanical School was also granted to such of the pupils as desired to pursue a longer course of study during the last two years of their stay in the College. Twenty-five have taken advantage of this offer :

In electrical mechanics	8
Wood working	7
Metal working	6
Foundry	4

The Battalion of Cadets, consisting of 38 commissioned officers, 45 musicians, 97 non-commissioned officers, and 360 privates, is satisfactorily pursuing its studies in military science and tactics.

The Summer Encampment continued for ten days in July, at Island Heights, New Jersey, and was satisfactory in all respects.

The report of Captain Eli D. Hoyle, U. S. A., the inspecting officer detailed by the War Department to visit the Camp and to make a general inspection of the Battalion, is very complimentary to the officers and cadets. It shows "discipline excellent," "behavior in Camp highly commendable," and the report concludes as follows:

"The cadets reflect credit on their College and on their military instructor. It is a significant fact that a college which aims to prepare boys to make a living at eighteen years of age, should so value and encourage military training, and it shows that the best means to inculcate habits of order, promptness, obedience, and respect for authority are appreciated here as they are beginning to be appreciated all over the country."

The report of the PHYSICIANS is one of statistics only, and these are gratifying.

The total number of cases treated was	2,865
---	-------

A decrease from the previous year of	200
--	-----

Two deaths occurred:

From septicæmia	1
---------------------------	---

From chronic valvular heart disease with nephritis . . .	1
--	---

The general health of the College pupils, employes, and officials, was excellent.

The report of the STEWARD is always interesting in its detail of the provisions furnished.

The average cost *per capita* of pupils, \$73.14, includes the subsistence furnished the officers and employees at the College tables, but is calculated only upon the average number of pupils: 1,525.

The total, \$111,534.34, includes the subsistence of the Summer Encampment and of the collation to the Alumni on Founder's Day. Compared with the preceding year there is a reduction of \$2,891.46. The report for 1901 showed a similar reduction of \$2,030.81.

The population of the College during the year 1902 was as follows:

Number of pupils January 1st, 1902	1,489	
Admitted during the year	200	
		1,689
During the year there were		
College indentures canceled to enable boys to accept employment	174	
Returned to mothers and friends, transferred to other institutions, &c.	12	
Left at eighteen years of age	8	
Died	2	
		196
Number of pupils December 31st, 1902	1,493	
Officers { Instruction	69	
{ Household	46	
	— 115	
Employes of household	275	
		390
Total, December 31st, 1902	1,883	

The following table shows the number of applicants registered for admission into Girard College, and the number of boys in the college on January 1st, 1903, born in the different counties of Pennsylvania:

County.	On the List of Applicants.	In the College.	County.	On the List of Applicants.	In the College.
Adams	2	1	Mifflin	3	4
Allegheny	4	7	Monroe	2	3
Bedford	1	3	Montgomery	29	56

McKean		1			
				777	1,493

In the number registered for admission there is a decrease
from Philadelphia of 17
and an increase from other parts of Pennsylvania, &c., 31
Total increase 14

There are pupils in the College, or applicants registered for admission, from 57 of the 67 counties of the State.

The SUPERINTENDENT OF ADMISSION AND INDENTURES reports 200 admissions and 196 dismissals of pupils from Girard College; also a summary of the present condition and the immediate future prospects of the 1106 young men honorably discharged from the College during the years 1896-1901.

The several extracts from letters received from our graduates show not merely their present location and employment in all parts of the world, but also the pleasant recollections and thorough appreciation of the benefits derived from their early training.

The report states that the demand for stenographers, clerks, &c., is in excess of the number of our graduates, and expresses the hope that the increased time of study in the Mechanical School may result in similar demands for young men desiring to follow mechanical pursuits.

The report of the SUPERINTENDENT OF GIRARD ESTATES (*Appendix A*) shows the following receipts:

	Gross.	Net.
From Real Estate within the City	\$658,072 98	\$368,158 03
Stocks, Bonds, &c.	204,597 33	204,219 68
Total	\$862,670 31	\$572,377 71
From same sources in 1901	778,481 89	533,640 02
an increase of	\$84,188 42	\$38,737 69

The increase in receipts from Real Estate in the City, amounting to \$91,187 82 gross and net to 45,978 18, is caused by the increase in rentals of the property on Market and Chestnut Streets between Eleventh and Twelfth Streets, by the more general renting of the Mariner and Merchant Building at Third and Chestnut Streets, and by greater demand for property generally, which latter has materially decreased our vacant real estate. A slight increase results from the collection of rentals monthly instead of quarterly.

The large advance in the price of coal, the placing of additional safety appliances on the elevators in the Stephen Girard Building, the increased cost of the operation of the power house because of the larger occupancy of the Mariner and Merchant Building, the alterations and enlargements of 1100-1114 Market Street, and the more than ten per cent. increase in taxes paid to the City of Philadelphia, have absorbed nearly fifty per cent. of the increase in gross income.

Some of the increases in the expenditures are not permanent; others are the result of greater occupancy of our large buildings, and augment the net income, but continued increase in city taxes is assuming serious proportions.

The alterations in the building at Eleventh and Market Streets, incident to a change in occupancy, should have produced larger net income available for the support of the Girard College, but because of the excessive increase in the assessed valuation of this property, the increase in rentals will not be so large as the increase in taxes.

Legal steps have been taken to test the equity of this unreasonable demand upon the funds of Mr. Girard's great charity.

The Mariner and Merchant Building was opened for public inspection on March 4th, 1902, and more than 2500 of Philadelphia's most prominent citizens were present on that occasion.

Demands for offices in this building increased to such an extent that the original plans, for offices on the lower and for light manufacturing purposes on the upper floors, were modified. The cost of these modifications was fully justified, 82 per cent. of the building being under lease at the close of the year.

The power house was also completed during the year, and from it heat, light, and power are furnished to our buildings in its immediate proximity, and contracts for light and power are being made with our tenants in the vicinity of Front and Market Streets and at Fifth and Chestnut Streets.

The lighting of Delaware Avenue and of Front Street will be done from this point after January 1st, 1903, when the contract with the Brush Electric Light Company expires.

The work on the Girard Bank Building was completed and the Girard National Bank resumed possession of this property on December 20th, 1902, under a ten years' lease.

The alterations did not change the exterior of this historic building, but the interior was entirely rebuilt. The changes are not only æsthetically beautiful, but also up to the highest standard of modern banking methods, and our lessees occupy one of the most commodious and handsomest banking houses in the country.

The Stephen Girard Building has been fully occupied during the whole year. The gross receipts were	\$108,827 54
an increase of	\$1,466 83
and the net receipts were	\$51,080 29
an increase of	\$6,286 62

The alterations at 1100-1114 Market Street were completed, and the whole block bounded by Eleventh and Twelfth and Market and Girard Streets is now occupied by Messrs. N. Snellenburg and Company.

To supply heat, light, and power to their extensive establishment, they have placed the necessary plant under the cartway and the north sidewalk of Girard Street.

Girard Street was widened for traffic by removing the front gardens on the sidewalk and widening the cartway to twenty-two feet. As soon as the weather permits, this improvement will be completed by repaving the street with asphalt.

The work of developing the Girard Estate in the southern part of the city continues steadily. Ordinances for the opening of streets have been passed by City Councils and juries of view to assess damages for such opening have been appointed.

Grading and curbing of several streets are actually under way, and trees are being planted on the sidewalks.

Girard Park is kept in good condition by the Estate, and the work of filling the lowlands at Girard Point, by dredgings from the rivers, is making progress.

The stoppage of the supply of anthracite coal by the long strike of last Summer and Autumn gave much anxiety to all owners of office buildings and managers of large institutions.

The fortunate storage at the beginning of the year of 2500 tons of buckwheat coal, the purchase of 1,000 tons for use at the Girard College, and of an additional 1,000 tons from the North American Washery, located upon the coal lands of the Girard Estate, for our several power plants, reduced the cost of fuel much below the price at which those not so fortunate were compelled to buy.

It is hardly probable that a strike so general and so long continued will again occur, but the experience of the year just passed emphasizes the need of large storage facilities.

The FIRE INSURANCE FUND is slowly increasing.

The assets amount to	\$44,098 72
and the amount at risk to	<u>\$1,013,350 00</u>
an increase in assets of	\$4,229 80
and an increase in amount at risk of	<u><u>\$95,000 00</u></u>

caused by :

Stephen Girard Building, increase	
insurance	\$10,000 00
Girard Bank Building, increase	
insurance	35,000 00
Mariner and Merchant Building,	
new risk	<u><u>50,000 00</u></u>

During the year the Girard Estate paid the city	
for water rents	\$6,268 21
for taxes	<u>\$113,451 29</u>
an increase in water rents of	\$357 66
and an increase in taxes of	<u><u>\$10,718 70</u></u>

The increase in taxes is caused chiefly by increase in assessed valuation. This matter has been considered in an earlier part of this report.

The improvement of DELAWARE AVENUE is approaching completion.

An agreement has been made by and with the several railroad companies claiming the right to lay railroad tracks upon Delaware Avenue, limiting the number of tracks to three. When these are laid, the cartway will at once be repaved with Belgian blocks upon a concrete foundation, and the curbs will be reset and the sidewalks repaved upon revised lines.

It is hoped that this work may be finally completed in 1903, and that the city of Philadelphia may be able to extend this magnificent thoroughfare beyond the limits named in Mr. Girard's will as the object of his bounty.

It is proper to repeat here that this work in all its parts has been without expense of any kind to the taxpayers, and that its future care, cleaning, and lighting, will be defrayed from the income from Mr. Girard's legacy of \$500,000.00.

The principal of this fund continues at	\$500,000 00
and the accumulated income is	\$147,167 00

This latter sum will be expended in the completion of the work so satisfactorily brought to its present condition.

The income from investments was in 1902 . . .	\$25,248 24
and the expenditures, other than for investments, were	\$34,196 96
The expenditures included for widening Delaware Avenue	\$16,542 75

The report of the SUPERINTENDENT (*Appendix A*), with the report of the ENGINEER OF THE GIRARD ESTATE IN SCHUYLKILL AND COLUMBIA COUNTIES (*Appendix B*), and the appended reports, give a full account of the important operations in connection with the Girard Lands in these counties.

The total receipts from real estate outside the city of Philadelphia were :

	Gross.	Net.
In 1901	\$412,020 77	\$341,214 86
In 1902	192,853 97	128,996 75
Decrease	<u>\$219,166 80</u>	<u>\$212,218 11</u>

	Tons.	Cwt.
Shipments of coal, 1901	1,248,034	20
“ “ 1902	636,165	9
Decrease	<u>611,868</u>	<u>11</u>

or 49 per cent.

The total coal shipped from the Girard Lands in 1902 was 636,165 tons. 9 cwt.
To this should be added coal used for
mining purposes 138,482 “ 6 “
showing an output of 774,647 “ 15 cwt.

The coal used in mining operations in 1901, when 1,248,034 tons were shipped to market, was 188,080 tons. In 1902, with 636,165 tons shipped to market, it was 138,482 tons.

The decrease in coal tonnage of practically one-half, and of net income of more than 50 per cent., is the result of the strike of last year, which will be considered in detail in another part of this report.

There was a slight reduction in income by reason of the increased shipments of percentage of small coal upon which a smaller royalty is paid the land owner.

In 1901 the percentage of chestnut and larger coal was . 55.85
In 1902 it was 49.76

In addition to the sizes heretofore named as shipped, .21 per cent. of culm is reported in the year 1902.

These shipments, showing more economy in consumption, are profitable to both operator and land owner by reason of the use of coal heretofore going to waste, but it reduced the average royalty paid in 1901 from . . . 28.07 cents per ton to . . . 26.63 “ “ in 1902.

The percentage of the different sizes of coal shipped compared with previous years, is as follows:—

Year.	Large. Per cent.	Chestnut. Per cent.	Pea. Per cent.	Buckwheat. Per cent.	Rice. Per cent.	Barley. Per cent.	Culm. Per cent.	Per Cent.
1863 .	90.00	10.00	100
1867 .	87.49	12.17	.34	100
1878 .	77.22	12.52	10.19	.07	100
1895 .	50.64	20.31	11.51	16.54	1.00	100
1902 .	30.67	19.09	15.47	23.49	10.25	.82	.21	100

The shipments of Pennsylvania anthracite coal

during 1902 were 31,200,890 tons

A decrease of 22,367,711 “

Our report for the year 1901 contains the statement that “the unusual and steadily growing activity in all the industries of the land, but especially in iron and steel, has made unprecedented demands for fuel, the total consumption of coal, anthracite and bituminous, being largely in excess of that of any previous year.” This condition of affairs has continued in the year 1902; but unfortunately for the Girard Estate, the anthracite collieries have not only failed to get their share of the increased business, but for reasons which are stated elsewhere in this report, their tonnage has decreased to a figure far below that of any recent year, and less than that of any year since 1884.

It may be suggested that coal in the ground is realty, and that the land owner is not damaged because it remains unmined, and that hence the Girard Estate, as such, suffered no loss by reason of the strike which practically suspended the mining of coal from May 12th to October 22d.

During this time the shipments from the several collieries of the Estate fell off more than 600,000 tons, reducing the income from royalties nearly \$200,000.

This sum being the proceeds of real estate sold, if received would have been reinvested in other real estate, or in bonds or mortgages, and it is a correct statement to claim that the income of the Estate, pledged for the support of the Girard College, is decreased to the extent of the income which these investments would have produced.

But this immediate and continuing loss is not the only damage coming to the Estate, whose interests in the anthracite region are not limited to the ownership of the veins of coal.

In addition to the 4229 acres of coal lands, the Estate owns 12,079 acres of farm and timber lands, and a large number of town lots in the boroughs and the mining villages in the Mahanoy, Shenandoah, and Catawissa Valleys.

With a population of 700,000 dependent for its existence upon the mining and shipment of anthracite coal, it is readily seen that a strike like that of last year, continuing for a longer time than any previous differences between operator and miner, and managed with a severity almost beyond belief, must bring distress and damage to all in any way interested in or connected with the affairs of the anthracite coal region.

The strike is provisionally ended, and it is hoped that the plans now under consideration for the adjustment of the alleged grievances will result in an early and a permanent settlement, but its remembrance is too vivid, and its history so fully written, that only a simple statement of its relations to the Girard Estate, and thus to the affairs of the Girard College, is needed here.

We report as Trustees for and Managers of one of the grandest charities of the age, but as individuals and as citizens we unite in the hope that a repetition of the scenes of last Summer and of their dire results, may never again distress and discredit the Commonwealth of Pennsylvania.

Mining operations during the year were delayed and made more expensive by the flooding of several collieries by the rain storms of December, 1901, and February, 1902, and by the accumulation of mine water when pumping was stopped by the strike. Several operations are still idle because of the impossibility of clearing them of water, even by so many weeks of steady pumping.

The driving of gangways, sinking of slopes and shafts, and the opening of new breasts, the "dead work" of anthracite veins, have been pushed as rapidly as the peculiar condition of affairs permitted.

The shipments from the Washeries, which seem not to have been seriously interrupted by the strike, amounted

in 1902 to	174,650 tons
an increase over 1901 of	13,045 "
The coal consumed in mining coal was	138,482 "

or 22 per cent. of the coal shipped.

This is an increase of 7 per cent. over 1901 and is due to the heavy pumping needed in the attempt to keep the mines free from water.

The forestry work begun by the Girard Estate in 1877, but now carried on by the Girard Estate and the Girard Water Company jointly, has been continued by the opening of fire roads, the clearing of underbrush, and the maintenance of a fire patrol. There were no serious forest fires in 1902 and the tree plantations continue to do well. No additional trees were planted.

The several farms in the Catawissa Valley are all under lease at small rentals.

The timber lease to James M. Stauffer expired on December 8th, 1902. A lease for five years was made to Mrs. Andrew Faust and brother.

The receipts from the sale of sand and stone, from the leases of lots and farms and the cutting of timber were \$7,251.72.

The Engineer reports "the tendency in the year 1902 has been toward higher tax rates." In several of the townships where the Girard Estate and coal companies own large tracts of land, associations of land owners have been formed for keeping the roads in repair at no cost to the citizens and individual taxpayer. By this method better roads are secured at a reduced cost.

Mr. John B. Granger, Mine Inspector of the Girard Estate since October 1st, 1891, died on September 14th, 1902.

Mr. Granger was a practical miner, thoroughly competent in all respects for the place he ably filled for ten years. His character in all the relations of life was of the highest.

The community in which he spent his whole life mourns the loss of an honest and a useful citizen, and the Estate the loss of a faithful and conscientious officer.

Mr. Henry J. Weller, a practical miner from boyhood, was appointed December 1st, 1902, to fill the vacancy caused by the death of Mr. Granger.

The report of the GIRARD WATER COMPANY (*Appendix C*) shows large increase in receipts for water supplied, notwithstanding the non-shipment of coal during five months of the year.

The largest increase in consumption was during the first five months of the year, when many of the collieries were forced to use their pumps to the full capacity to clear the

mines of the water, the result of the floods of December, 1901, and February, 1902. During the next five months the consumption was limited to the making of steam to prevent the accumulation of mine water during the suspension of shipments of coal. In November and December the normal consumption was reached.

The total consumption was 340,470,868 gallons.

There were used at 13 col-
lieries and washeries 241,630,636 galls. or 71 per cent.
by 2 railroads 8,653,744 " " 3 " "
and for domestic purposes

by 7 lessees 90,186,488 " " 26 " "

Total 340,470,868 " " 100 " "

an increase of 34,728,967 gallons over the year 1901.

The smallest consumption was in June, 16,278,648 gallons.

the largest " " " January, 38,225,716 "

In 1884, the first year of the Company's
existence, the consumption was . . . 92,848,023 "

The total quantity of water supplied to its
customers in 19 years was 3,499,796,194 "

The weather records kept at the reservoirs of the Company show a total precipitation for the twelve months ending December 31st, 1902, of 61.55 inches
Average for 15 years preceding 54.03 "

An increase of 7.52 "

The greatest precipitation was in September . . . 8.44 "

and the least " " May 1.31 "

There was rain or snow fall on 127 days

the greatest being in July 17 "

Water is furnished to the small consumers at the rate of 10 cents per 1000 gallons, and to the collieries and other large consumers at a minimum charge of \$50 per month for 1,000,000 gallons or less, and at 10 cents per 1000 gallons for all used in excess of 1,000,000 gallons.

The average receipts during 1902

were	8.72	cents per 1000 gallons
and for 1901	8.35	" " "

The total receipts of the Company were :

for Water-rents	\$27,705	20	
" Ice-cutting Privileges	358	22	
Miscellaneous	215	92	
			\$28,278 61

An increase of \$2,799 23

The total expenditures were :

Rent of Pipe-lines	\$12,500	00	
Repairs to houses and stables	222	10	
" " reservoirs	1,040	85	
General improvements	3,077	56	
Stationery and miscellaneous expenses	290	45	
Taxes	1,050	22	
Salaries	960	00	
Dividends	11,970	00	
Forestry	56	80	
			31,167 98

An increase of \$1,932 98

Excess of expenditures	\$2,889	37
----------------------------------	---------	----

There has been no increase in the acreage of land, nor in the capacity of the reservoirs owned by the Company, nor in the length of pipe used in the distribution of water. Needed repairs and enlargements of the waste ways were made at a cost of \$3077.56, and $1\frac{3}{4}$ miles of a wall of rough stones, laid dry, was built for the enclosure of the water shed. This wall will be completed in 1903-04.

The property of the Company is in excellent condition.

The pipes for the distribution of the water, are laid and maintained by the Girard Estate. For their use the Water Company paid in 1902 a rental of \$12,500.

It is proper again to report that all the profits of the Water Company inure to the benefit of the Girard Estate, which owns all the stock, except three shares, which latter issue was required by law to effect a company organization, and to add that such a Corporation was necessary to prevent a diversion of this water supply to the profit of a private company, and to the detriment of the tenants of the Girard Estate.

The report of the SUPERINTENDENT OF MINOR TRUSTS (*Appendix F*) contains in condensed form the statements of the financial and statistical accounts of 35 Trusts, classified as follows :

Hospitals	3
House of Correction and Almshouse	3
Schools	4
Medals	3
Loans to artificers	2
Fuel and food	15
Miscellaneous	5
	<hr/>
	35

The Capital accounts, the current receipts and expenditures, and the receipts from legacies, donations, &c., summarize as follows :

Total invested capital of all the Minor Trusts . .	\$1,326,351 53
An increase of	\$19,675 00
derived from the following sources :	
Legacy received by Wills Hospital	\$5,000 00
Stumpage: timber cutting on	
Boudinot Estate	\$1,861 13
and sale of land	5,587 32
	<hr/>
	7,448 45
Sundry amounts of income capitalized . . .	7,200 00
	<hr/>
Forward	\$19,648 45

Forward	\$19,648 45
Reduced assessment on real estate belonging to	
Estate of Frederick A. Sheaff	\$600 00
" Elias Boudinot	3,452 00
	<u>\$4,052 00</u>
Decrease in uninvested capital	4,078 55
	<u>26 55</u>
	<u>\$19,675 00</u>
The current income was	\$49,168 69
A decrease of	<u>\$54 79</u>
The receipts from legacies, donations, &c., were	<u>\$8,592 29</u>
The principal expenditures were :	
Wills Hospital	\$19,606 72
Mary Shields Almshouse Fund	4,156 72
Fuel Funds	9,167 00
Food—Bread and Soup	887 00
Books, medals, school purposes, &c., including	
annual payment to the Southwark Library	
from the Grover Estate	1,713 66
Simon Muhr Scholarships	<u>2,621 84</u>

The total cost of the administration of all the Minor Trusts was \$2,622.76.

From the income of twelve FUEL FUNDS, 1712 tons of coal were distributed under the personal direction of the members of the Board.

Of the coal, 1080 tons were paid for from the income of the Thomas D. Grover Fund. The conditions of this Trust limit the distribution "among white widows of respectable character, who are housekeepers or roomkeepers, born within the limits of the United States of America, whose husbands shall have died within the present defined boundaries of the district of Southwark."

The other coal purchased was distributed as follows :

1	trust in the former district of Spring Garden	20½ tons.
1	" " " " " " " the N'th'n Liberties,	41½ "
4	" " " old city of Philadelphia	274½ "
5	" " " present city of Philadelphia	295½ "
	Total	<u>632 "</u>

The higher price of coal during the winter of 1901-02, with the permanent reduction in income, because of the low rate of interest on investments, has permanently reduced the quantity available for relief.

This condition is greatly aggravated by the difficulty of securing a supply of coal for distribution during the winter of 1902-03. Because of the coal strike, it was impossible to find any dealer in coal willing to make a definite contract except at prices so exorbitant as to be prohibitive, and the only way out of this dilemma was to buy coal by the cargo and to contract for its delivery under separate agreement.

This necessarily increased the cost per ton and will greatly reduce the quantity to be distributed.

The income from the SOUP TRUSTS, \$887, was expended through the various Soup Societies.

The income from the STEPHEN GIRARD SCHOOL FUND purchased 334 books for the six grammar schools in the (old) city of Philadelphia. From the income of the JULIANA H. GOOD FUND 436 books were purchased for the House of Correction, and the usual payment of \$300 was made to the Southwark Library Company from the GROVER FUND.

Under the SIMON MUHR FUND two additional scholarships were awarded, one in the University of Pennsylvania, and one in Wellesley College.

All holding scholarships under this Trust do credit to their benefactor.

From the income of the HANNAH M. DODD MEDAL FUND one gold and one silver medal were awarded each in the Classical and in the Commercial Course of the Girls' High School.

No loans were applied for "by young married artificers, &c.," under the JOHN SCOTT or the DR. BENJAMIN FRANKLIN FUNDS.

The latter fund now amounts to \$145,011.34, of which sum \$110,695.68 awaits the erection of the proposed art gallery in Fairmount Park.

The Board of Directors of City Trusts is ready to apply this latter sum for the purpose indicated whenever the proper authorities are prepared to begin the long delayed work.

Upon the recommendation of the Franklin Institute, eight medals and premiums were awarded from the income of the JOHN SCOTT MEDAL FUND to "ingenious men" for "useful inventions."

The expenditures from the MARY SHIELDS ALMSHOUSE FUND amounted to \$4156.72, the full amount of the current income.

The expenditures in 1901 were much greater because of new furniture and fixtures purchased with the accumulated surplus of former years.

The Visiting Physician appointed by our Board reports additions to the diet of the sick, concerts and coach rides for the convalescing, work for those physically well but mentally unsound, modern hospital appliances for the bedfast, with reading matter for the studious, and instruments for those with musical tastes, have been supplied as heretofore.

The expenditures for these objects were :

Coach rides and trolley excursions	\$185 00
Concerts, entertainments, &c.	825 00
Hospital furniture, pictures, &c.	79 20
Books, games, musical instruments, &c.	436 33
Provisions and delicacies	1,262 65
Material for employment.(mattress making)	668 54
	<hr/>
	\$3,456 72

The men, insane patients, employed in the upholstery shop have manufactured 28 new mattresses and 18 new pillows. 804 mattresses and 338 pillows were re-upholstered by them. The material for the work was supplied from this fund.

The reports from the BOUDINOT LANDS are very gratifying.

The fire roads opened, and thoroughly burned out at proper intervals, and increased watchfulness by our lessees, enable us to report for the first time in many years, "no forest fires."

The young timber continues to make extraordinary growth and unauthorized cutting of trees is entirely stopped. Mature and useless trees are being cut under leases, from which stumpage has been received amounting to \$1,886.13. The income from rents, &c., swell the total gross receipts from real estate to \$2307.13.

The income from investments amounted to \$1223.55. This sum will be much larger in 1903 because these investments have been increased \$8600 during the past year.

The net increase in invested capital is \$5148, the sale of some portion of the land to the Commonwealth for a Forest Reserve having decreased the assessed value of the lands \$3452. There will, however, be no reduction of income because of this sale.

The land sold extended in a narrow strip for nearly seven miles along the southeast side of the west branch of the Susquehanna River. Because of its formation and location it was impossible to prevent either forest fires or unauthorized timber cutting, except at a cost in excess of the value of the property.

The Forestry Commission of Pennsylvania had acquired a large tract of land adjoining the Boudinot Lands on the north and east, and it was deemed desirable that this property should be extended to the river. After due advertisement and at a public sale the Commission purchased 2800 acres at \$2 per acre.

The remaining land, about 8000 acres, is compactly located, easily protected, and for the purposes of the Elias Boudinot Trust practically as valuable as the larger tract had been.

The following changes in the SURGICAL STAFF OF THE WILLS HOSPITAL occurred during the year 1902 :

Dr. William Thomson, Attending Surgeon, resigned, and Dr. William C. Posey was appointed to the vacancy.

Dr. Charles J. Jones was appointed Assistant Surgeon to Dr. Charles A. Oliver, and Dr. Archibald G. Thomson, Assistant Surgeon to Dr. William C. Posey.

Dr. William Thomson was appointed Consulting Surgeon.

Dr. W. L. Carroll was appointed Resident Surgeon, in place of Dr. Harold G. Goldberg, whose term of service expired.

Dr. Homer J. Rhode was appointed Resident Surgeon, in place of Dr. W. L. Carroll, resigned, and Dr. Arthur J. Bedell, Resident Surgeon, in place of Dr. John Newhall Kirk.

To concentrate responsibility and authority, and thereby secure more efficient service, the Board, at the suggestion of the Medical Staff of the Hospital, created the office of Executive Medical Officer and appointed Dr. McCluney Radcliffe to the position. The results fully justify the creation of the office and the appointment of the incumbent.

The report of the MEDICAL STAFF OF THE WILLS HOSPITAL (*Appendix G*) is as satisfactory as can be expected in view of the straitened finances of this admirable institution.

The following is an abstract of the statistics of the Hospital:

Number of patients treated :

	1901.	1902.	Increase.	Decrease.
House patients	682	392	. . .	290
Clinic "	<u>13,333</u>	<u>14,406</u>	<u>1,073</u>	. .

Number of new patients :

House patients	353
Clinic "	<u>14,406</u>
Total	<u>14,759</u>

Number of visits of patients to Clinics 51,179

Number of operations performed 1,941
 " " " for cataract 136

Admitted as House patients, resident in Philadelphia	132
Resident elsewhere	221
Total	<u>353</u>

The House patients are classified as follows :

	Males.	Females.	Total.
Number on January 1st, 1902	27	12	39
Admitted 1902	<u>272</u>	<u>81</u>	<u>353</u>
	299	93	392
Discharged 1902	<u>290</u>	<u>87</u>	<u>377</u>
Remaining December 31st, 1902	<u>9</u>	<u>6</u>	<u>15</u>

The discharges were as follows :

Cured	264
Improved	100
Unimproved	7
Died	1
Not treated	3
Eloped	2
	<u>377</u>

The total number of patients treated at Clinics is classified as follows:

From 53 of the 67 counties of the State	13,295
From 17 other States	<u>1,111</u>
Total	<u>14,406</u>

Of those admitted as House patients, there came from

33 counties of the State	308
From 5 other States	<u>45</u>
Total	<u>353</u>

Total number of patients treated since the opening of the Hospital in 1834 :

House patients	23,842
Clinic patients	<u>290,890</u>
	<u>314,732</u>

The residences of patients are as follows :

Lancaster "	1	28	29				
Lawrence "	—	4	4	Total	353	14,406	14,759

The unfortunate financial condition of the Hospital, so frequently and so fully named in previous reports, continues, except for the aid received from an anonymous friend, who contributed \$3000, with which were completed sundry repairs, absolutely necessary to prevent the closing of the wards to all house patients.

Because of the too long continued desire to care for all deserving cases coming to us for treatment, and in the hope that help would come from State appropriation or by private contribution, all the income was annually expended for maintenance of patients, and the hospital buildings and their equipments were neglected. The former became almost uninhabitable and the latter altogether unfit and inadequate for the surgical work.

The liberal donation named above has been of the greatest immediate importance, but ample permanent relief is not in sight.

The customary Act for an appropriation from the State Treasury is under consideration by the Legislature now in session at Harrisburg, and we sincerely trust that it may be enacted into a law.

The total receipts in 1902 were	\$26,367 42
An increase over 1901 of	<u>\$8,355 53</u>

This increase is from the following sources:

Estate of Miss Harriet S. Benson . .	\$5,000 00
Anonymous contributor	3,000 00
William C. Bullitt	200 00
The Sharpless Dye Wood Extract Co.,	100 00
The Misses Blanchard	100 00
Sundry donors	192 29
	<u>\$8,592 29</u>

The Benson Legacy has become a part of the invested capital, and it cannot be hoped that the other contributors will repeat their splendid gifts.

The total expenditures were	\$19,605 72
The expenditures for repairs were	3,447 51
Current expenses	<u>\$16,159 21</u>

There was a reduction in cost of maintenance of . .	\$3561 45
but a net reduction of only	<u>\$113 94</u>

The current permanent receipts about equal the present expenditures for maintenance, but there are no funds for other uncompleted repairs needed in all branches of the Hospital.

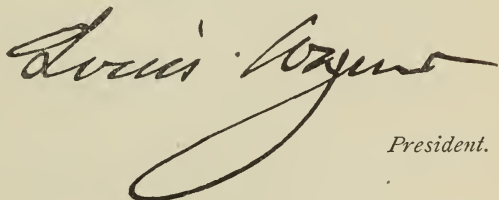

In reducing to the limits of the income the number admitted as house patients, we preferred for treatment those not resident in Philadelphia, because most of these applicants had no means of maintenance so far from their homes.

Mr. Wills directed that treatment should be free of charge, and that in the admission to the Hospital preference should be given to persons residing in Philadelphia and its neighborhood.

In view of previous State aid, this direction has not been strictly observed, but unless relief shall come from the same source, the treatment of persons not residing in the vicinity of Philadelphia, may have to be discontinued.

In submitting for the thirty-third time a report of our administration of these many trusts, we respectfully ask a careful examination of the appended reports of the several officers in executive charge, in the hope that their work, done by our direction and under our supervision, may have approval.

In behalf of the Board of Directors of City Trusts.

A large, elegant handwritten signature in dark ink, reading "Lucius Rogers". The signature is written in a cursive style with a long, sweeping underline that loops back under the name.

President.

PHILADELPHIA, January 1st, 1903.

APPENDIX D.

Professor of Spanish.

ALFRED NEWLIN SEAL, PH. D.,
Professor of Chemistry and Physics.

MAJOR H. G. CAVENAUGH,
U. S. A. (retired),
*Professor of Military Science and
Tactics.*

FRANK A. CHALMERS,
Teacher of Phonography.

MISS MARIAN B. HERITAGE,
Teacher of Elocution.

LIBRARIAN.

MISS MARY MECUTCHEN.

TEACHERS IN THIRD FORM.

MISS CHARLOTTE E. OVERN,

MISS HESSY R. MILLER,

MISS EMILY P. TOWN,

MISS INEZ E. WALSH,

MISS ELIZABETH McDUFFEE,

MISS MARY D. WARE,

MISS VIRGINIA B. TUCKER,

MISS SUSAN B. PRICE,

MISS LOUISE ST. C. WOLF,

MISS MARY E. ROBB,

MISS MARGARET WYLIE.

TEACHERS IN SECOND FORM.

MISS ANNIE DEAN SWIFT,	MISS GEORGIE A. CURRIE,
MISS JANE PEOPLES,	MISS C. JESSICA J. DONNELLY,
MISS KATHARINE H. BROPHY,	MISS BESSIE BURNETT,
MISS BESSIE SHARP,	MISS IONA M. NOWLEN,
MISS EMILY E. PAYNE,	MRS. EVA ROBERTS STEVENS.
MISS MARY PEOPLES,	MISS HELEN A. WILSON,

TEACHERS IN FIRST FORM.

MISS CHARLOTTE A. RAGOTZKY,	MISS MARTHA D. SHARP,
MISS KATHERINE L. MORGAN,	MISS LAURA MAE BENSON
MISS ANNA M. SHENK,	MISS EDNA LEIPER,
MISS JANE KNOX JACKSON,	MISS HANNAH F. SHERRON,
MISS KATHARINE S. PAUL,	MISS ERMINNIE L. JOHNSON,
MISS LILLIE MacFARLAND,	MISS ALICE POTTER ERVIN,
MISS MAY KENNEDY.	

MISS FANNY WEST, <i>Teacher of Drawing.</i>	WILLIAM D. BASTERT, <i>Instructor of Brass Band.</i>
THOMAS A'BECKET, <i>Organist.</i>	THOMAS WINN, <i>Precentor.</i>
JERRY MARCH, <i>Professor of Vocal Music.</i>	LOUIS LEWIS, <i>Instructor of Gymnastics.</i>

MECHANICAL SCHOOL.

THELLWELL RUSSELL COGGESHALL,
Superintendent.

DAVIS EAVENSON, <i>Instructor in Wood Turning.</i>	JOHN UPRICHARD, <i>Instructor in Plumbing.</i>
CHARLES M. KNAPP, <i>Instructor in Electrical Mechanics.</i>	ROBERT H. CLINGER, <i>Instructor in Carpentry.</i>
CHARLES S. WILLIAMSON, B.S., <i>Instructor in Mechanical Drawing.</i>	WM. HOWARD ECHTERNACH, <i>Instructor in Foundry.</i>
GEORGE A. PEDDLE, <i>Instructor in Iron Work.</i>	GEORGE W. NORTON, B.S., <i>Instructor in Sloyd.</i>
JOSEPH G. SIMCOCK, <i>Instructor in Blacksmithing.</i>	

HOUSEHOLD.

STEWARD.

FRANK O. ZESINGER.

MATRON.

MISS ANNA M. SHREVE.

ASSISTANT MATRON.

MISS JOSEPHINE ROSS.

GOVERNESSES.

MISS MARY L. GOVERS,	MRS. HANNAH E. EARL,
MISS SARAH M. CHEW,	MRS. EDITH W. STONE,
MISS CAROLINE M. WHITECAR,	MISS LILIAN T. SMITH,
MRS. FANNY T. BOAS,	MISS SARA H. WHITBY,
MISS VIRGINIA MILLER,	MISS MARGARETTA P. BULLOCK,
MRS. EMMA NOBLE,	MISS MARY MCBRIDE,
MRS. ANNA H. RAINIER,	MRS. MARGARET A. SPIESE,
MISS MARY FRANKLIN,	MISS ELIZABETH THORNILEY,
MISS PHOEBE C. SILLIMAN,	MISS LIZZIE C. DARE,
MISS ADELE C. CASE,	MISS MARY S. CHANCE.
MISS ELIZABETH EKINGS,	MRS. MARGARET J. THOMAS,
MISS LOUISA LAU.	

SENIOR PREFECT.

SUPERINTENDENT OF ADMISSION AND INDENTURES.

JOHN S. BOYD, Stephen Girard Building, 21 South Twelfth Street.

GIRARD COLLEGE.

PRESIDENT'S REPORT FOR 1902.

To the Board of Directors of City Trusts:

GENTLEMEN—During the year 1902 there were admitted to the College, 200 boys.

DISCHARGED :—

Indentures canceled—

To enable them to accept positions	174	
For physical disability	2	
On mother's plea of ability to support	3	
Given up to mother	1	
	<hr/>	180
Eighteen years of age		8
Expelled :		
For misconduct	4	
For prolonged absence without leave	2	
	<hr/>	6
Died		2
	<hr/>	
Total		196

Number enrolled December 31st, 1902 1,493

CHANGES.

There were the following changes in our teaching force during the year:

Miss Laura E. Baymore, teacher in Second Form, resigned March 31st.

Miss Lenna M. Vautier, teacher in First Form, resigned August 19th.

In the Household:

Mrs. Elizabeth Krickbaum, Governess since 1884, died November 17th.

Dr. Henry G. Godfrey, Resident Physician, resigned November 30th.

To the vacancies in the Department of Instruction Miss Alice Potter Ervin and Miss May Kennedy were appointed. Mrs. Margaret J. Thomas takes the place made vacant by the death of Mrs. Krickbaum, and Dr. Howard G. Fretz succeeds Dr. Godfrey as Resident Physician.

In the death of Mrs. Krickbaum the College has suffered a serious loss, possessed as she was of rare and admirable qualities of mind and disposition. Her life was to her pupils an example of Christian living; her teaching was that of the Christian teacher; and her beneficence was Christian beneficence, since it consisted in giving herself. Modest, quiet, and retiring by nature, she was yet devoted, persevering, and constant in the discharge of duty. If, at times, she felt discouraged there was no outward manifestation of it. If she was ever impatient over her work or disappointed over results, such was her self-control and equanimity that her nearest friends rarely saw indications of it. She lived and acted as if always in the presence of the Master, who has said, "Inasmuch as ye have done it unto one of the least of these, my brethren, ye have done it unto me." She has passed from earth, but her good deeds will live in those whose lives she has directed and whose characters she has moulded, and who will rise up and call her blessed.

CHANGES IN BUILDINGS 3, 5, AND 10.

The large room on the third floor of Building No. 10, formerly used as a lecture room, has been divided up into four good-sized class rooms. By utilizing these rooms and a class room on the second floor, hitherto unoccupied, we were enabled to transfer to Building No. 10 the five classes whose recitation rooms had up to this time been on the first floor of Building No. 3. We then converted the five rooms in No. 3 into four rooms of larger size, three of which are

occupied as study rooms for the boys who formerly had their study rooms in Building No. 5, and the fourth one will be occupied for physical drills. This change has among its advantages the following:—

1. It transfers the five classes formerly in No. 3 from a building intended more especially for house and study purposes to one used exclusively for recitation rooms.

2. It gives to the three sections formerly in No. 5 more commodious and more healthful study rooms.

3. It has enabled us to provide suitable accommodations for the Steward and his assistants, and store rooms both ample in size and convenient of location.

4. By using the one room in No. 3, and another provided on the third floor of No. 10, we shall be able to give physical training to all the boys of the College so soon as the rooms are properly equipped and an instructor provided.

THE HEALTH OF THE COLLEGE.

In so large an institution as Girard College the health of the pupils is always a matter of grave concern. Many of our boys on coming to us have not yet had the contagious diseases incident to childhood and early youth. With friends living in all parts of the city they are likely on holidays to visit where some of the diseases are epidemic. The past year, we are pleased to say, has been one of exceptionally good health. There were but two deaths:—

April 10th, Carl Miller Matthews, ten years old, heart disease.

December 6th, John Ellis Blakely, eleven years old, blood poisoning.

On the principle that preventable diseases should be prevented, we attribute our good health to the wholesome sanitary condition of our buildings and the generally favorable hygienic regulations of the institution. The best preventatives we believe to be wholesome food eaten at proper times and at regular intervals, well-ventilated school rooms and dormitories, with plenty of sleep, and abundant exercise in the open air.

INSTRUCTION.

With the beginning of the year 1900 a new schedule of recitations in the Fourth Form went into effect. This change rendered it necessary to make some material changes in the curriculum in the different departments. These were in some departments made at once; in others, they were made gradually, owing to special conditions.

The following is a somewhat detailed summary of the work as laid out in the several departments of the Fourth Form:—

DEPARTMENT OF ENGLISH AND HISTORY.

Class 4-1.

1. History of the United States, studied by topics, beginning with the Revolution.
2. English Language: (a) The grammar of the language, preparatory to the later study of rhetoric, including the relations of the parts of speech in the sentence, discrimination in the meaning of the words, and the proper order and arrangement of words in sentences. (b) Literature: Selections from English and American authors are read, studied, and commented upon. (c) Composition: Practical exercises.

Class 4-2.

1. History of the United States to the present date, continued.
2. English Language: (a) The study of grammar, continued. (b) Literature: Selections from English and American authors are read, studied, and commented upon; written exercises. (b) Composition: Practical exercises.

Class 4-3.

1. The History of England: A general survey, with special topics taken up from time to time for fuller consideration by means of reference books.
2. English Language: (a) The study of grammar, continued. (b) Literature: Selections from English and American

authors are read, studied, and commented upon; written exercise. (c) Composition: Practical exercises.

Class 4-4.

1. The History of France: A general survey, with special topics taken up from time to time for fuller consideration and study by means of reference books.

2. English Language: (a) The study of grammar, completed; rhetoric begun. (b) Literature: Selections from English and American authors are read, studied, and commented upon; written exercises. (c) Composition: Practical exercises.

Class 4-5.

General History begun: Greek, Roman, and Mediæval history. Special attention will be given to the most important periods. These will be studied largely by means of reference books.

2. English Language: (a) Literature: Selections from English and American authors are read, studied, and commented upon; written exercises. (b) Rhetoric: Practical exercises. (c) Compositions written upon subjects suggested for the most part by studies in rhetoric, literature, and history.

Class 4-6.

1. General History, continued: Greek, Roman, and Mediæval history. Special study of the more important periods. These will be studied largely by means of reference books.

2. English Language: (a) Literature: Selections from English and American authors are read, studied and commented upon; the life and times of the author; his style, diction, &c. Books of reference, including the works of leading authors, are employed for individual reading and research; written exercises. (b) Rhetoric: Practical exercises. (c) Compositions written upon subjects suggested for the most part by studies in rhetoric, literature, and history.

DEPARTMENT OF FRENCH.

*Class 4-4.***(a.) Preliminary Instruction.**

1. General information about the French language, its origin and derivation; its uses at different times and in different parts of the world; its literary, social, historical, and practical importance; its principal features, &c.

2. General rules of pronunciation; relation of consonants with vowels, or syllables with words, or words with the clause or sentence—inflections, vowel and diphthong sounds, orthographic signs, syllabic accents, the mute E, &c.

(b.) Oral Course.

Consisting of a series of lessons based on the pupil's daily life, taking his duties one by one, and in order, such as rising, washing, dressing, going to breakfast, recess, study room, chapel, class room; &c.

1. These facts are presented as units and evolved with all the details they logically and chronologically suggest to the mind.

2. Both the facts and details are described in simple, but idiomatic sentences, the teacher and pupils being thus put at once into a communion of ideas clearly perceived and idiomatically expressed.

3. Words are not taught singly, as in a vocabulary, but in sentences: that is, in their actual living functions.

4. The verb is made the principal object of study, as it is the principal factor in the sentence, describing the facts perceived.

5. The ear and tongue are trained first, not through spelling or English sounds, but directly with the French sounds emitted by the teacher.

6. The pupil, after mastering a lesson, has an opportunity to repeat it to himself, whenever actually performing the duty described, and thus to practice French at all times, to express his perceptions directly in French, without the medium of English.

7. To each descriptive text is added, first, a vocabulary appropriate to the subject; second, idiomatic locutions generally used in connection with the text or vocabulary.

(c.) Oral and Written Drill in French Verbs.

Both regular and irregular, taking first the commonly used. This drill is continued throughout the entire course of three terms.

Class 4-5.

(a.) Grammar.

The pupil, having acquired a sufficient vocabulary and good habits of pronunciation, is now given some reading matter and a short French grammar.

The rules of grammar are at first taught incidentally, although systematically, as their application can be seen and illustrated in the reading texts. They are only memorized after many examples have been thus explained.

Suitable exercises in translation are given, whenever necessary, to illustrate the rules more fully. Special attention is called to the construction of the French sentence as compared with the English.

The drill on verbs is continued.

(b.) Reading and Conversation.

The reading texts are made topics for conversation and occasional exercises in dictation and recitation. Purity of sounds, accuracy in accent and inflections, fluency of speech are principally aimed at.

(c.) Composition.

"Introductory French Prose Composition," by François, is given in the latter part of the term, towards the end of which a systematic review of grammar is also made.

Class 4-6.

(a.) Reviews.

A systematic review of grammar and conjugation is first made, after which the pupils are furnished ample reading matter in ordinary prose and easy poetry.

(b.) Reading and Conversation.

The text is read several times, when necessary, by teacher and class. Idiomatic expressions and constructions are thoroughly explained. The text is then made a subject for conversation. A summary of the text is sometimes dictated as a means of improvement in spelling and as a training of the ear. The drill on irregular verbs is continued daily, for five minutes at least.

(c.) Composition.

François' "Introductory French Prose Composition" is continued, furnishing a good drill in transposition and translation.

Towards the end of the term a practical vocabulary is again given to the pupils.

DEPARTMENT OF SPANISH.*Class 4-2.*

1. Pronunciation of vowels and consonants. Gender of nouns. Formation of plural of nouns and adjectives. Drill upon words and phrases in common use, which the pupil is required to record in the note book.

2. The grammar of the language. Conjugation of the verb. A practical vocabulary. Exercise, oral and written.

Text book: DeTornos' Combined Spanish Method.

3. Reading, translation and conversation. Business letters. Text book: Worman's First Spanish Book.

Class 4-3.

Grammar, reading and conversation. The pupils continue the work of the preceding class in DeTornos' Combined Spanish Method and finish Worman's Reader. The Second Reader is then taken up, introducing the pupil to more difficult Spanish. In this class translation of what is read is, as a rule, not demanded, the object being to enable the pupil to receive the impression directly from the Spanish phraseology, without the mediation of English. Extemporaneous sentences on the subject of the lesson follow, for the purpose of promoting

conversation. These lessons alternate with the writing of compositions and business letters. Reviews are often held. By the end of the course the pupils will have acquired the ability to translate ordinary Spanish, to understand what is said to them, and to construct sentences with reasonable ease.

DEPARTMENT OF NATURAL HISTORY.

Class 4-1.

A text book is first used to make the pupils acquainted with the names and uses of the different parts of plants, and as soon as possible they are given laboratory work—seeds, stems, roots, and flowers being examined.

Class 4-2.

Zoology is taught; the animals, other than those which are microscopic, are shown to the class, and the characteristics and habits of animals dwelt upon.

Class 4-3.

Continues the study of Zoology, as in the preceding class.

Class 4-5.

Commences the study of Mineralogy. First, the elements of Crystallography; then the principal minerals are shown to and handled by the class. Afterwards drawers containing unlabeled minerals are given to the class, the contents of which they are required to determine. Geology.

Class 4-6.

Is taught Hygiene and the simplest elements of Anatomy. The recitations are illustrated by a very complete set of papier-maché models.

DEPARTMENT OF CHEMISTRY AND PHYSICS.

The time given to this department is two years. Chemistry is taken up the first year, and Physics the second year. This plan has been adopted owing to the fact that the pupil can do better work in physics after he has had more mathematics.

Class 4-3.

Chemistry.—Text book: Remsen's Elements of Chemistry. Time: Four periods a week.

As much as possible of the work is done by the pupils in the laboratory. Illustrated lectures are given only when the experiments are difficult and dangerous to perform, or require too elaborate apparatus for the student's use.

The course is of the usual nature, taking up first the difference between chemical and physical action, followed by a study of the conditions affecting chemical action, and finally by experiments with the non-metals and their simpler compounds.

Each pupil has a separate desk provided with a combination lock, and is held responsible for the careful use of the apparatus.

The keeping of an orderly, neat, and accurate note book is made a prominent feature of this work. The note books are carefully examined at short intervals, errors noted, and corrections entered by the class at a later period.

Thorough oral recitations and reviews are held after the work has been done in the laboratory, and a written test is given from time to time.

To show the connection between subjects studied in school and practical affairs, a few trips are made to factories where some of the compounds studied are used. The galvanizing works and the ammonia ice-machine plant are generally visited by this class. After making the visit the pupils are required to present brief accounts of the process. Standard works of reference are kept in the class room and are consulted after the trip has been made. These papers are corrected and returned to the writers.

Class 4-4.

Chemistry.—Text book: Remsen's Elements of Chemistry. completed. Time: Four periods per week.

In this class the work is a continuation of that in the previous one. After completing the study of the acid-forming elements and their most important compounds, the metals are considered. With this part of the subject, in order to make the

work more interesting, the elements of qualitative analysis are studied. This is done, however, as an aid to a study of the metals, and not as a means of teaching qualitative analysis. At the end of the term a brief time is spent in studying a few of the most important organic compounds and their relations to each other.

Whenever possible a few quantitative experiments, to illustrate the fundamental laws of chemistry, are performed by those students who have finished the required work.

This class generally visits the glass works and the paper mills.

Class 4-5.

Physics.—Text book: Hoadley's Brief Course in Physics. Time: Five periods per week.

In the study of physics the subject is first presented in the form of an illustrated lecture, followed by recitations and finally by written reviews.

The laboratory work is taken up afterwards. This course has been adopted since the experiments in physics are more elaborate and difficult than those in chemistry. The course has been planned to follow the requirements of college admission.

In the lecture work the usual course is followed of presenting the subject of measurement, and especially of the metric system first. This is followed by quite a thorough course in mechanics with a considerable amount of problem work. The subject of heat is then taken up, and this is followed by sound, light, magnetism, and electricity.

The recitations following the lectures are varied by oral reviews, and are followed by a monthly written test.

A partial list of the experiments performed in the laboratory by the students is as follows:—

Mechanics :

Measurement by metric standards, including the relations between the metric and English systems.

Parallelogram of forces.

The pendulum.

The lever, three classes.

Density and specific gravity.

Specific gravity of liquids by use of the hydrometer.

Pressure in fluids.

Determination of tenacity by breaking wire.

Hydrostatic press.

Heat :

Calibration of thermometer.

Co-efficient of linear expansion.

Specific heat of lead.

Latent heat of fusion.

Latent heat of vaporization.

Dew point.

Magnetism and Electricity :

Magnetism.

Field of force around a bar magnet.

Simple galvanic cell.

Two-fluid galvanic cell.

Determination of electro-motive force and current strength.

Measurement of resistance by Wheatstone bridge.

This class visits the gas works and rolling mills.

Class 4-6.

Physics.—Text book: Hoadley's Brief Course in Physics.

Time: Ten periods a week.

The work of this class is a continuation of the previous term, and includes the latter part of the material outlined above. As this class has daily a double period, more time is devoted to the laboratory than before.

This class visits the sulphuric acid and general chemical manufacturing plant and a blast furnace.

Since January, 1901, the following articles have been added to the equipment of the Department of Chemistry and Physics:

Microphone.

Ampere's law apparatus.

12-inch induction coil.
Röntgen ray tube and screen.
Wireless telegraph receiver.
Westphal balance.
Chaslyn balance.
Simplified Atwood's machine.
Direct vision spectroscope.
Compound microscope and attachments.
Automatic water still.
Duplicates of physical laboratory apparatus sufficient for classes of forty.

DEPARTMENT OF MATHEMATICS.

Class 4-1.—Algebra begun.

Class 4-2.—Algebra continued.

Class 4-3.—Algebra finished; Geometry begun.

Class 4-4.—Geometry continued.

Class 4-5.—Trigonometry, theory, and calculation of tables and of plane triangles.

Class 4-6.—Surveying. Study of text relating to surface measurements, contours, profiles; plotting on paper and calculations. Practice in using chain, compass, transit, plane table, level.

Text books: Fisher & Schwatt's Secondary Algebra; Wells' Essentials of Algebra; Phillips & Fisher's Elements of Geometry; Phillips & Strang's Elements of Trigonometry; Davies' Elements of Surveying and Leveling.

DEPARTMENT OF BOOKKEEPING, PENMANSHIP, AND DRAWING.

Class 4-1.

Arithmetic (Milne's Standard), commencing at beginning of book and going as far as possible during the term, usually to interest. Mental and written exercises.

Class drills in rapid calculations in the four fundamental rules; also class drills on the more important divisions of the subject, such as division of decimals, factoring, relation

of numbers, practical measurements, &c., with many supplementary problems.

An examination of the class at the completion of each subject or division of a subject.

Class 4-2.

Arithmetic (Milne's Standard), continued until completed, taking usually three or four months of the term. Mental and written exercises.

Class drills in rapid calculation, in interest, bank discount, and trade discount, &c.

Drills in supplementary problems and principals.

Pupils produce written work.

An examination of the class at the end of each division of the subject.

Balance of term, writing and free-hand drawing from the flat, free-hand perspective, shades and shadows, some sketching and designing.

Class 4-3.

Bookkeeping (Sadler-Rowe Commercial and Industrial System), introductive set.

Many supplementary exercises, drills, and tests in business forms; papers and problems in accounting.

Rapid and accurate calculation and drill in principles are special features.

Penmanship.

Class 4-4.

Bookkeeping, continued. (Same system.)

Wholesale and retail business and partnership concerns.

Many supplementary exercises, drills, and tests, as before.

Advanced problems in calculating loss or gain per cent. in business transactions.

Business correspondence.

Class 4-5.

Bookkeeping, continued. (Same system.)

Jobbing and commission business, as carried on by corporations.

Problems in opening books for corporations.

Different features of keeping books introduced.

General review of whole subject.

Commercial arithmetic reviewed for the last five or six weeks of the term, with drills in rapid and accurate calculation.

Distinctive features of the whole work in bookkeeping are that the pupil is learning from the standpoint of an employee, and that he writes all *outgoing* papers, while all *incoming* papers are already written.

DEPARTMENT OF EXPRESSION.

Classes 3-7, 3-8, and 3-9. (Each class one lesson a week.)

Enunciation: Correct quality of elementary sounds.

Proper accent.

Correct syllabication.

Phonics: Drill in.

Expression: Exercises in expressive speech by the "key-word" method; conversational reading.

Classes 3-10 and 3-11. (Each class one lesson a week.)

Advanced work on outline of previous grade.

Expressive Reading: Conversational; descriptive.

Articulation practice.

Class 4-2. (Four lessons a week.)

Correct use of the voice.

Expressions by pitch, force, time.

Emphasis by quantity, pause, volume.

Sight Reading.

Advanced Analytical Reading.

Movement for purpose of location, illustration, emphasis.

DEPARTMENT OF PHONOGRAPHY AND TYPEWRITING.

Class 4-4.

Stenography: Principles and easy dictation.

Typewriting: From charts and long-hand copy.

Class 4-5.

Stenography: Phrase writing and fast dictation.

Typewriting: From short-hand notes and tabulating work; letterpress copying and index work.

Class 4-6.

Stenography: Rapid speed practice.

Typewriting: Transcribing business letters from notes.

The work in this class is optional, being taken up by those students who desire to perfect themselves by practice outside of the regular sessions.

Text books.—Stenography: Analogical Syllabic Shorthand; Typewriting: Easy Method Typewriting Charts.

Instruction is given during one year of two terms, five days each week, and three and a half hours each day.

DEPARTMENT OF MILITARY SCIENCE AND TACTICS.

1. Organization.

This department comprises a battalion of six companies, band, bugle and drum corps, and signal detachment, and is organized as follows:

One commandant, an officer of the Regular Army detailed by the War Department.

Two staff officers (adjutant and quartermaster).

Two color sergeants.

Two non-commissioned staff officers (sergeant major and battalion quartermaster sergeant).

Six captains.

Twelve first lieutenants.

Thirteen second lieutenants.

Six first sergeants.

Thirty-one sergeants.

Fifty corporals.

Forty-five band, drum and bugle corps.

Ten signal detachment.

About three hundred and fifty privates.

2. The practical instruction embraces:

The school of the soldier and physical drill.

The school of the company.

Butts' Manual.

The school of the battalion.

Extended and close-order drill.

The ceremonies of review, inspection, parade, guard mounting.

Signalling with flags and heliograph.

Castramentation (during the Summer encampment).

The band is organized from Cadets, and a civilian employed to instruct the band and field music.

Company drills are held twice per week, and on Fridays battalion drill and dress parade.

3. The theoretical instruction is given to Class 4-5, and consists of recitations in drill regulations, United States Army, up to and including battalion drill and extended order.

Organization.

Security and information.

Outposts.

Advanced and rear guard.

Orientation and map reading.

Army regulations.

Manual of physical drill.

General questions.

Lectures on military subjects and customs of the service, upon which the students are required to take notes and submit the results in writing.

Text books: Wagner's Catechism of Outpost Duty; drill regulations; questions and answers (compilation) on military subjects.

Blanks furnished by the College: Muster rolls, discipline lists, enlistment blanks, discharges, monthly and daily reports, &c., &c.

The most promising privates are furnished with copies of the drill regulations pertaining to the manual of arms, and are directed to study them. These privates are then subjected to a written competitive examination, the result of which, taken in connection with their military bearing, determine their promotion to the rank of corporal.

The battalion is supplied with a complete equipage for camping, and spends about two weeks in July, every year, in camp at Island Heights, N. J.

THE MECHANICAL SCHOOL.

The reports from the Superintendent and instructors of the Mechanical School are very encouraging. The most important event of the year in this department is the introduction of trade teaching. At the beginning of the year a course was arranged by which such boys as elected to do so, could spend four hours a day during their last two years in one department of the Mechanical School. There are now twenty-five (25) boys taking this course, and they have chosen departments as follows:

Electrical mechanics.....	8
Wood work.....	7
Metal working.....	6
Foundry	4

These boys,* after spending the morning hours (8 to 12) in their regular classes, go to their trade work at one o'clock and continue until five. On Saturdays they spend the entire morning in the Mechanical School. In this way they receive each week twenty-four hours of trade instruction. This being continued during two years should make the lads reasonably proficient. Thus far the interest has been well maintained, and we have every reason to be well satisfied with the results of the experiment.

There is urgent need of more space in the Department of Foundry and Blacksmithing, especially in the latter. The Superintendent has prepared a plan by which this building can be enlarged without great cost. He will be pleased to submit this to the Committee, should it be their wish to have him do so. Great credit is due to all the teaching force of the Mechanical School for their untiring interest and zeal. They work hard and in harmony with one another. Visitors to this department of the institution have none but favorable comments to make on what they see.

It has been decided to revise the course of study as adopted in 1894. The Vice-President is doing the work with great care and with such suggestions as have been made by the teachers in the different grades and departments. The manuscript will, we think, be ready in the course of a few months, to be submitted to the Committee and to the Board.

THE HOUSEHOLD.

The Prefects and Governesses are doing an important work, even though there are no records to indicate it. The daily life of the boy when not in school is to a great extent what the Household officer makes it. The lessons learned here are like those learned in the family, being largely the result of influence.

The Household officer is to a degree responsible for the boy's health. He sees that he bathes regularly, eats judiciously, exercises sufficiently, and that his sleeping apartments and study rooms are kept properly ventilated; he is responsible for the boy's reading, as he directs in a great measure the kind of literature he reads, and the thoroughness and care with which he reads it; for the boy's manners, as by his constant intercourse in various ways and at various times he teaches both by example and by precept what proper deportment is; for the boy's habits, as it is for him to see that punctuality, cleanliness, proper system and order are instilled and practiced in his daily tasks; for his thrift and economy, as in many cases he is the custodian of the boy's spending money and of his bank book, and so has many opportunities of

teaching lessons of the proper disposition of money even in small sums.

We are under many obligations to the men and women of this department for the quiet, unostentatious, and yet faithful, conscientious, and thorough manner in which their work is done.

THE SUMMER ENCAMPMENT.

The College cadets had their usual season in camp, lasting ten days—from July 8th to July 18th. The report of the Commandant shows that good discipline was maintained and that the health of the boys was excellent. There were no cases of serious illness and no accidents. There was an inspection by Captain Eli D. Hoyle, of the Regular Army, on July 12th, and the following extracts from his report are worthy of notice:—

“The battalion of cadets is encamped near Island Heights, N. J., on a site which has been used for several years for their annual encampment. The camp was established July 8th, and will be broken up July 18th. Major Cavanaugh commands the camp, the usual military routine of duties (roll calls, drills, ceremonies, guard duty, &c.) is pursued, and every effort is made to promote the instruction, health, comfort, and pleasure of the cadets. The camp is situated in a large open field on the shore of Toms River, and, except for the pest of mosquitoes, is ideal. The natural drainage is excellent, and the ground is covered with a good turf, close cut. The tentage, which is the property of the College, is ample and excellent.

“Mr. Frank O. Zesinger, Steward of Girard College, an experienced and very able officer, has charge of the mess and other business affairs of the camp. A kitchen with ranges, &c., complete, is established in a temporary frame building, trained cooks are employed, and excellent meals furnished the cadets, who are seated at tables under canvas, by companies. The kitchen, mess furniture, tables, &c., were in excellent condition.

"A dwelling house near the camp is used as a hospital. Dr. Henry G. Godfrey, Resident Physician of Girard College, was in charge, with excellent trained female nurses in attendance. There are twenty beds, with dispensary, kitchen, &c., all in excellent condition. During the present camp the health of the command has been excellent.

"The sinks were in excellent condition and well cared for.

"There is an excellent bathing place in the Toms River near the camp, which affords much pleasure and healthful exercise to the cadets. Limits are marked by stakes, life-saving boats are kept at hand during bathing hours, and all precautions taken against accidents. A fine sail boat, with an experienced sailor in charge, is hired for the pleasure of the cadets during the encampment.

"A thorough inspection was made of the camp, and it was found well ordered, clean, and neat throughout.

"The annual encampment is thoroughly enjoyed by the cadets, who are benefited in many ways by the out-door life and exercise.

"I received a review of the battalion, which was paraded in undress uniform and commanded by Major Cavanaugh. The marching and military appearance of the command were very good. In forming line the left hands were placed above the hips, as in the School of the Soldier (paragraph 122, I. D. R.), and in marching there was an exaggerated swinging of the arms (paragraph 192, I. D. R.). With these exceptions the ceremony was well performed throughout.

"Battalion inspection immediately followed the review. The arms and accoutrements were in good condition. The uniforms were generally in good condition, neat, and well fitting, except that many of the caps were without straps, old, faded, and unsightly.

"The cadet band furnished good music for the ceremonies, and their instruments, &c., were in good condition.

Number of cadets in camp.....	505
Present at inspection under arms.....	433
Absent: Guard, 51; sick, 14, with leave, 7....	<u>72</u>
Total	505

"The exercises for inspection consisted of battalion drill, company drill and extended order; advance guard; signal drill, and battalion exercise in Butts' Manual, with accompaniment of music.

"The drills throughout were very good.

"The guard, which consisted of an officer of the day, an officer of the guard, one sergeant, four corporals, one musician, and forty-one privates, was turned out and inspected. The police of the guard tents and vicinity was good, and guard was creditably performed. The members of the guard were examined and found well instructed.

"The great majority of the cadets are very young, their ages ranging from twelve to eighteen years. Their discipline is excellent, and their orderly behavior in camp highly commendable. The cadets reflect credit on their College and on their military instructor. It is a significant fact that a college which aims to prepare boys to make a living at eighteen years of age, should so value and encourage military training, and it shows that the best means to inculcate habits of order, promptness, obedience, and respect for authority are appreciated here as they are beginning to be appreciated all over the country."

In closing this report I again take pleasure in bearing testimony to the faithful and loyal performance of duty on the part of my fellow-laborers, in thanking the gentlemen of the Board for their assistance and support, and also in commending our large family of boys for their manly conduct and for their generally cheerful compliance to the rules and regulations of the institution.

HEADQUARTERS CORPS OF CADETS.

GIRARD COLLEGE,
PHILADELPHIA, PA., July 1st, 1902.

Orders No. 140.

I. By direction of the Board of Directors of City Trusts, the Girard College Cadets will, on July 8th, 1902, proceed by rail from Philadelphia, Pa., to Island Heights, N. J., and there go into camp.

II. The camp thus established will be named "Camp Stephen Girard."

III. At 6.30 A. M., July 8th, the battalion will be formed in line in front of building No. 5 (President's office). The route of march will be south on Corinthian Avenue to Fairmount Avenue, to Twenty-first Street, to Mt. Vernon, to Broad Street; Broad Street to the Pennsylvania Railroad Station, Broad and Market Streets. The Corps of Cadets of Girard College will upon arrival at the statue of the founder of the College, on west side of City Hall, render such appropriate ceremony as may be fitting they should in appreciation of all the benefits derived by them from his forethought and generosity.

Upon arrival at Island Heights the battalion will disembark, and form in line east of depot facing west.

Immediately upon arrival in camp the flag will be hoisted, the first relief of the guard posted, and the companies then stack arms in their company streets. The companies will march to dinner, without side arms. After dinner the clothing and camp equipage will be distributed, and the tents put in order.

IV. The following regulations will be strictly observed during the encampment:

All entrance to and exit from the camp, for cadets, will be by the tent of the officer of the guard.

No cadet will leave camp without special permission.

No cadet will go in bathing out of the regular hours.

No cadet will be allowed in rear of the line of cadet officers' tents except to march to meals, visit the sinks, or to see the commanding officer.

Cadets desiring permission to leave camp will send their applications on the prescribed form, through their Captains, before 7.45 A. M.

Cadets on leaving camp will present their permits to the officer of the guard for examination. Upon returning to camp cadets will turn over to the officer of the guard their permits, who will indorse on the back thereof the time of return. These permits will be returned daily to the commanding officer by the old officer of the day, immediately after guard mounting, with the guard report-book.

The band will practice during the prescribed drill hours.

For minor offences cadets will be deprived of their privileges.

For serious breaches of discipline cadet officers will be placed in "officers' arrest" and confined to their tents; other cadets will be confined in the guard tent and have their meals sent to them.

Company morning reports must be at the Adjutant's tent before 7.45 A. M.

A guard consisting of a Captain as officer of the day, a Lieutenant as officer of the guard, one Sergeant, four Corporals, and forty-one privates will be mounted daily. At guard mounting the Adjutant will select the cleanest, neatest, and most soldierly private as Orderly for the Commanding Officer. (See pars. 182 to 191, "Manual of Guard Duty.") The guard will be divided into four reliefs, and the time divided equally among them, so that each relief shall walk post one hour at a time.

Cadets on guard will, when not on post, remain at the guard tents, except during the necessary times at meals, unless given permission to be absent for a necessary purpose by the officer of the guard.

During meal times one non-commissioned officer of the guard and two privates will remain at the guard tents. The other members of the guard, except the relief on post, will be marched in details by the senior members to their company mess tents at the proper time for meals. After the regular meal is over, the relief on post and the other members of the guard will march to (Band) mess tent for their meal.

The officer of the day and the officer and members of the guard

members of the guard in their duties as guards and sentinels, and will see that they thoroughly understand said duties.

A report of all delinquencies will be sent to the Commanding Officer with the morning reports.

No punishment will be given unless first approved by the Commanding Officer.

First Sergeants will march their companies to and from swimming. The officer of the day will be present during the bathing hour. He will be held responsible for proper conduct during that time, and will see that all orders on the subject are strictly complied with by the cadets.

A double line of buoys will be anchored. Small cadets will not go beyond the inner line of buoys, and no cadet will be allowed to go beyond the outer line of buoys.

Mr. Jacob Smith is announced as swimming master ; all orders given by him during the swimming hours will be obeyed promptly by any and all cadets.

By order of

MAJOR CAVENAUGH,

(Signed) JAMES T. HOPE,

First Lieutenant and Adjutant.

Official :

JAMES T. HOPE,

First Lieutenant and Adjutant.

HEADQUARTERS CORPS OF CADETS.

GIRARD COLLEGE,
PHILADELPHIA, PA., September 15th, 1902.

A. H. FETTEROLF, PH. D., LL. D.,
President Girard College, Philadelphia, Pa.

SIR :—I have the honor to submit the following report in connection with the camp of the Girard College cadets :—

In accordance with the orders herewith enclosed, the Battalion, consisting of six companies, band and field music, left the College at 6.30 A. M., July 8th, and marched to the Pennsylvania Railroad, Broad Street Station, halted at the statue of Stephen Girard, situated on the west side of the City Hall, where a simple ceremony was gone through with by the corps of cadets of the College, after which they were embarked upon a special train in waiting ; left station at 8.00 and arrived at Island Heights at 10.40 A. M. On arrival at depot at Island Heights the Battalion was formed and marched to the site where the former camps had been established. After going through the ceremony of raising the flag the Battalion was dismissed. After issuing the necessary camp and tent equipment the camp was put in order.

The camp guard was formed and sentinels posted, which important duty was performed in a thorough and satisfactory manner during the whole time of the encampment.

Drills were held in the morning, succeeded by the ceremony of guard mounting. The afternoon drills and parade were witnessed by many persons from the town of Island Heights and surrounding country, and many favorable comments heard. The improvement in drill was quite marked, and much credit should be given to the cadet officers for their desire to improve by study and practice ; there were but few errors on their part.

The weather was very good throughout the entire period of the encampment, but unfortunately there was a pest of mosquitoes, and had not the boys been furnished with mosquito netting their suffering would have been quite severe.

A sail-boat was in use twice daily, of the capacity of about one-half company, thereby enabling us to send at least one company

on a pleasure trip down the bay each day, which sail was thoroughly enjoyed by the cadets.

The camp was established upon the same ground as former camps, and in the same formation ; the only change was the covering of the sinks by canvas, which was a great improvement over other years, as the cadets were not exposed to the sun or rain as formerly. From a sanitary standpoint the advantage was great.

The report of Dr. H. G. Godfrey is herewith submitted.

The hospital used was a building near the camp, in fact the same building used in 1900 and 1901, which answered very well for the purpose, but not being occupied except the few days used by us, it is gradually deteriorating, notwithstanding which its use as a hospital has been very satisfactory, owing to the care and attention of the employees connected therewith. The camp surgeon, Dr. Godfrey, and the nurses (of whom Miss Wilson is the head), performed their duties in the most thorough and satisfactory manner, and should be congratulated upon the very small percentage of serious sickness.

Mr. Frank O. Zesinger, steward of the College, had charge of the establishment of the camp and the supply department, which duty was performed to my entire satisfaction and in a thoroughly business-like and economical way. The employees selected by him were very reliable, quiet and orderly in camp, and attended to their duties conscientiously.

I submit herewith a synopsis of the daily routine of the camp:—

July 8th.—Arrived at camp at 10.40. Camp established. Hon. Edwin S. Stuart, Chairman of the Military Committee, Mr. Frank M. Highley, Secretary of the Board of Directors of City Trusts, accompanied us to the camp.

July 9th.—Drills, parade and usual camp duties performed.

July 10th.—Drills, parade and usual camp duties performed.

July 11th.—Hon. Edwin S. Stuart, John M. Campbell, Esq., Mr. John H. Converse, members of the Board of Directors of City Trusts, ex-Director Mr. James R. Gates, Hon. Judge William B. Hanna, Mr. Frank M. Highley, and Prof. Alfred N. Seal, of Girard College, visited camp.

* Mr. Campbell and Judge Hanna remained in camp until the 13th.

Drills, parade and camp duty performed.

July 12th.—Miss Shreve, Matron of Girard College, Dr. John S. Boyd and his family, visited camp during the day. Inspection of the corps of cadets in the morning. No drills or parade. Usual camp duties performed.

July 13th.—Sunday. No military duties performed. Captain Magill, of the United States Marine Corps, was much pleased with the camp, especially with the sanitary conditions thereof.

July 14th.—Drills, parade and usual camp duty performed. Captain Eli D. Hoyle, Artillery Corps, assistant to the Inspector General, Department of the East, Governor's Island, New York, arrived in camp P. M.

July 15th.—Mr. John H. Michener, member of the Board of Directors of City Trusts, arrived in camp and remained over night. Camp and cadets inspected by Captain Hoyle, guard mounting, review, company and battalion drill, extended order, advanced and rear guard by companies, and parade, and a thorough inspection of the entire camp.

July 16th.—Prof. C. Addison Willis, of Girard College, visited camp. Drills, parade and camp duties performed. A congratulatory telegram to the corps of cadets from General Louis Wagner, President of the Board of Directors of City Trusts, from the Fallen Bastille, Paris, France, dated July 14th, 1902, was read at parade.

July 17th.—Hon. Edwin S. Stuart, Mr. William Stuart, Mr. John Develin, Dr. William Shields, Mr. Andrew MacDonald, visited camp. Drills, parade and usual camp duties performed.

July 18th.—Packed camp equipage. Broke camp at 2.30. Arrived at Girard College, Philadelphia, via Pennsylvania Railroad about 6.30 P. M.

It will be noted from the report of the surgeon that there were but five cases of sickness, that is, for more than twenty-four hours, which is less than one per cent. of the total number taken to camp, 505 cadets.

It was the desire of the Corps to remain in camp longer, but I explained to them that all the arrangements had been made for the time designated by the Committee for the encampment. The members of the Battalion appreciate highly the generosity of the Board for the pleasure and benefit derived by them during the outing, and I desire to add my thanks to the Board and especially

to the Military Committee for the encouragement given, as well as their presence in camp.

I would respectfully invite attention to the report of the Inspector, Captain Eli D. Hoyle, as it contains a very comprehensive and full report not only of the camp, but of the internal arrangements of the military department of the College.

I am, sir, very respectfully,

H. G. CAVENAUGH,
*Major United States Army, Professor
Military Science and Tactics.*

GIRARD COLLEGE INFIRMARY.

PHILADELPHIA, PA., September 1st, 1902.

MAJOR H. G. CAVERNAUGH, U. S. A., *Commandant*.

DEAR SIR:—The following is the medical report of Camp Stephen Girard from July 8th to July 18th, 1902:—

Acute indigestion	3 cases.
Rheumatism	1 case.
Concussion of brain	1 “

None of these cases were of serious nature.

This excellent showing is to be attributed to the perfect sanitation of the camp, and the thorough precaution against even minor accidents and injuries.

Very respectfully,

H. G. GODFREY, M. D.

APPENDIX E.

REPORT OF THE SUPERINTENDENT OF ADMISSION AND INDENTURES,

GIRARD COLLEGE.

PHILADELPHIA, December 31st, 1902.

To the Committee on Admission, Discipline, and Discharge :

GENTLEMEN :—I herewith submit a summary of my journal during the year 1902 :—

Pupils admitted	200
	==

Pupils dismissed :

College indentures canceled—

To accept positions	174
-------------------------------	-----

For physical infirmity	2
----------------------------------	---

On mother's plea of ability to support	3
--	---

Given up to mother	1
------------------------------	---

— 180

Eighteen years of age	8
---------------------------------	---

Dismissed :—

For malconduct	4
--------------------------	---

For prolonged absence without leave	2
---	---

— 6

Died	2
----------------	---

Total	196
	==

A report of all pupils who were honorably discharged from the College during the years—

1896	145
1897	169
1898	236
1899	189
1900	192
1901	175

1106

in number, is as follows :—

Employed, report favorable	966
“ “ fair	16
“ “ unfavorable	10
	— 992
Unemployed, report favorable	46
“ “ fair	3
“ “ unfavorable	4
	— 53
In other institutions	8
Died	20
No report	33
	— 1106

During the year just passed the encouraging demand—greater than the supply—for stenographers, clerks, office and store boys, &c., has continued, pupils frequently going out on trial weeks before they would, ordinarily, have left the College.

It is, as yet, too early to report any results of the recently introduced system of more advanced mechanical instruction, but another year will probably begin to indicate the advisability, or the reverse, of the hitherto untested scheme.

Gratifying evidence is not lacking of the utility of the variety of branches now embraced in the curriculum of the College. A young man, employed by a company constructing a railroad in central Cuba, writes: “Many a night have I sat in my ‘bunk’ and thought that, had it not been for my thorough education, I

would have never achieved the success I have made. I cannot think without deep gratitude of the labors and trials which the teachers and professors went through to give me an education."

Another, now "Chief Sanitary Inspector" for the "Insular Board of Health," Manila, P. I., writes: "I might say that without the mechanical training I received at Girard College, I would be unable to properly fill this position; the knowledge of sanitary plumbing, electrical work, and mechanical drawing, which our dear old instructors managed to hammer into my head, is now reaping me an abundant harvest." He enlisted as a nurse in the United States service, and has been expecting to study medicine.

Still another remarks, in a postscript: "My early College spiritual training has been a foundation stone."

Interest in military affairs becomes less pronounced as the army is gradually being reduced to a peace footing, although an occasional enlistment still occurs. Quite a number, however, are members of the National Guard, and were engaged in active service during the recent strike in the anthracite coal region.

Many expressions of esteem have been received concerning the late Mrs. Elizabeth Krickbaum. Her quiet but beneficent influence is evidently held in affectionate and grateful remembrance by those who, in their earlier College career, were so fortunate as to be committed to her motherly supervision.

Six of those in the foregoing list have died—one in Pittsburgh, Pa., of typhoid fever, and five in Philadelphia, Pa., three of typhoid fever, and one of congestion and the other of consumption of the lungs.

The various occupations of those reported to be employed are as follows:

Agent (baggage)	1	<i>Brought forward</i>	26
“ (purchasing)	1	Bookbinder	1
Architect	1	Bottler	1
Bakery	11	Box factory	5
